Birdview Program and Map CD-ROM

- The program CD-ROM is required for software updates and to store languages into the system.
- The system can store 2 languages in the following combinations:

Version 2:

- 1) English and German
- 2) English and French
- 3) English and Dutch
- 4) German and French
- 5) French and Dutch
- 6) English and Italian

- We recommend always to use the latest version of the program CD, because the program CD might include system software corrections.

- Map CD-ROM are exclusively developed to enable the specific 3D 'Birdview' operation.
- The coverage is based upon the Navtech database.
- User manual is included with the program CD (in the same languages as mentioned in version 1 (English, German, French and Dutch); version 2 (English, German, French, Dutch and Italian))

Version 3:

Version 3 is similar to 2.

Main differences:

Version 3 allows menu operation while driving.

Version 3 misses the possibility to set destination by intersection.
